

Mini-project: UMBB MobGuide

Important Remakes :

- This project is to be completed in **groups** of **4 to 6 students**.
- **Similar works** or any form of **cheating** will be **severely sanctioned**.
- The **deadline** for submitting the **source code**, **report**, and **presentation video** will be set later (**one week before classes end**).
- The **names** of all participating students must be **clearly** and **completely mentioned**.

The objective of this work is to develop a mobile application using the Android Studio environment. The proposed application, titled **UMBB MobGuide**, serves as a digital guide for the University of Boumerdès. This application aims to provide clear information regarding the university's various faculties and departments.

UMBB MobGuide offers a set of features allowing users to easily access information related to the University of Boumerdès. Among the main features, we can mention :

- **University Presentation:** Display a general description of UMBB.
- **Faculty Consultation:** View a list of the university's faculties.
- **Department Consultation:** Access departments associated with each faculty.
- **Detailed View:** Consult detailed information for a faculty or department (name, description, specialties, etc.).
- **Contact & Location:** Options to contact a faculty or department via **SMS, email, or phone call**, and locate them using **Google Maps**.
- **Search (Optional):** Search for a specific faculty or department.
- **Multilingual Interface (Optional):** Allow users to choose between **English and Arabic**.

For the storage and display of the application's data, use dynamic arrays (**ArrayList**) and **ListViews**.

It is requested to:

1. Develop the application (using Android Studio, Java/XML).
2. Produce a **report** (6 pages maximum) describing: the different application components (classes, interfaces, etc.), **the distribution of tasks among group members**, and **the features implemented** as well as those **not implemented**.
3. Produce a **video** with a maximum duration of **10 minutes**, illustrating the application, its main features, and its user interface.
4. **Create a folder on Google Drive** in which the **report**, **source code**, and **presentation video** will be deposited. This folder must then be shared with the instructor using the email address: "**umbb.mobguide2026@gmail.com**".
